

ENVIRONMENTAL POLICY

Recognizing our environmental impact as an industrial entity, we are dedicated to conducting our packaging machine manufacturing operations in a sustainable and responsible manner. We aim to minimize our ecological footprint, particularly by decreasing our energy and water usage, as well as by recycling our waste.

STOPPIL's environmental strategy encompasses the entire organization and engages all employees as stakeholders to attain the established objectives.

Our commitments

- Adhere to relevant environmental regulations and standards while striving to exceed them.
- Utilize high-quality and preferably recyclable materials in the production of our machines.
- Minimize our water and energy usage.
- Sort and recycle materials whenever feasible, both in the workshop and in the offices.
- Regularly assess environmental performance;
- Prefer local suppliers when their products or services align with our requirements.
- Enhance awareness and educate our employees on environmental matters.

Our objectives for 2025

- Inform all our customers about the options for recycling and retrofitting machinery.
- Educate and cultivate awareness among all employees regarding environmental concerns.
- Implement selective sorting across all services.
- Engage in initiatives for environmental conservation.

Management and departmental leaders are accountable for ensuring the effective implementation of established procedures.

The Directors regularly update the company's environmental policy, which is available for consultation by stakeholders upon request.
